**Introducing the Severe Weather Alert Package from Middle Tennessee Two-Way, Inc. You can now receive voice notification\* of incoming location specific NOAA Weather Radio Alerts over your two-way radios, using an easy to operate and inexpensive package. This system consists of your existing two-way radios, plus:**

- (1) Midland Radio WRR 300 All Weather/Hazards alert radio
- S.A.M.E. localized reception
- 23 programmable county codes
- Date, Time & Alarm clock
- Built in AM/FM Digital Radio
- Auto Switch from AM/FM to All Hazard Alerts\
- 10 memory alert
- Add/Edit/Remove unwanted alerts.
- Uses 4 AA Batteries (not included)
- AC Wall Adapter included
- Public Alert Certified

**And (1) Ritron Communications RQT150/450 Voice Notification Transmitter**

- 5 Watts of transmit power for maximum range, UHF or VHF
- Maximum voice message length.....8 seconds per switch condition
- when 1 switch input is used, 3.25 seconds per switch condition
- when 2 switch inputs are used.
- Plus a 3.25 second location message
- Auxiliary Messages.....Low Battery (1.5 seconds)
- External Power Failure
- (1.5 seconds)
- Message Scheduling.....User Programmable Intervals and
- Repeat Times
- Programming Method.....User Programmable with a
- standard pulse dial telephone.
- Programmable Features.....Transmit Frequency
- Sub-Audible and
- Digital Coded Squelch

**This system is available now, preprogrammed on your two-way radio's UHF or VHF frequencies and privacy codes for \$998.00 each. The system package will send out a pre-recorded voice message over your two-way radios whenever a severe weather alert is broadcast for your county\*.**

**Please call Cliff McCormack at (615) 890-6685 for a free demonstration today. Don't hesitate, as the severe weather season is upon us now!**

\*Note: This system will not rebroadcast the actual NOAA weather radio message. When a NOAA Weather Alert is issued for your county, a prerecorded voice message will be sent over your two-way radios, subject to message lengths noted above. It would be necessary to go to the Midland Weather Radio's physical location to hear the actual NOAA weather broadcast message. The QuickTalk voice transmitter can also be set to monitor door opening/closing, smoke detectors, an in-classroom panic button, or any number of other sensor inputs.
